Nefrolux General Partnership, with its registered office in Siemianowice Śląskie, has been successfully active in its treatment activity in Silesia since 2004. Nefrolux consists of hospital units, dialysis stations, diagnostic and multi-specialist units.

From the beginning Nefrolux consistently diversifies the scope of its medical services, develops and adapts to needs of its patients. We put emphasis on professional development of our employees and we run well-balanced financial management. It is a combination of professional knowledge, years of experience, highly skilled medical personnel and modern technology to satisfy the needs our patients. We offer reliable medical care and services on the highest standards.

The mission of our hospital is to provide services in the area of general and specialist health care as part of NFZ (National Health Fund) contract or commercially. The Nefrolux hospital holds a diagnostic unit and a rehabilitation centre especially for hospitalized patients and those treated on an outpatient basis. Also, the hospital treats those who were guided by different healthcare centres,

The Nefrolux hospital provides services to preserve, reinstate and improve health of people. Its goals are acknowledged by our employees, patients, contractors and the local community.

We avow that our patients receive professional medical service due to:

- Constant technical development of our personnel,
- Harmonisation of personnel's work
- Usage of modern machines and technologies
- Complexity of services
- Surveying the opinion of our patients and using those results to improve our healthcare.

Consistent development and enhancement of competence is influenced by outside assessments. The quality certificates: ISO 14001 and 9001:2008 stand as a confirmation.

The mission of our hospital is:

“ Patient's health and satisfaction is our goal”
